

Applications: From Specialty Departments to Real Hospital Workflows

BAND 1: SPECIALTY DEPARTMENTS

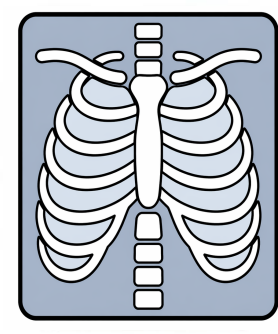

Radiology

X-ray

CT scanner

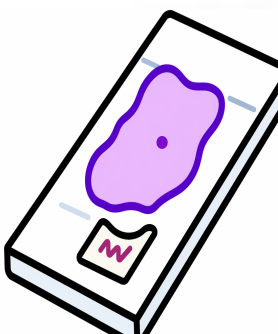

Chest film

Pathology

Microscope

WSI

Analysis

Ophthalmology

Eye

Fundus

OCT scan

Cardiology

Heart

ECG

Echo

Oncology

Tumor

PET scan

Dosing

Dermatology

Skin lesion

Dermoscopy

Ruler

BAND 2: INTEGRATION LAYER

Integration Layer

MCP

FHIR

PACS

EHR API

BAND 3: MULTI-AGENT ORCHESTRATION

Multi-Agent Orchestration

Human-in-the-Loop Review

Validate, correct & provide feedback

Perception Agent

Ingest & understand multimodal data

Retrieval Agent

Search & retrieve relevant data

Reasoning Agent

Analyze, reason & plan steps

Tool Agent

Use tools & execute actions

Report Agent

generate structured reports

Memory/
Knowledge Base

BAND 4: REAL HOSPITAL WORKFLOW

1

Patient Intake

Register & capture clinical information

2

EHR/PACS Retrieval

Retrieve records & prior studies

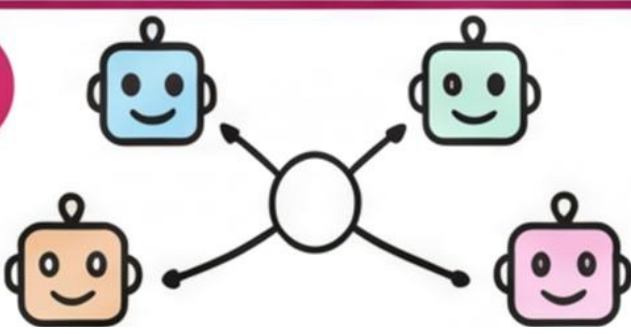

3

Multimodal Imaging

Aggregate imaging & pathology data

4

Multi-Agent Consult

Agents collaborate & produce insights

5

Diagnosis & Report

Generate structured report & findings

6

Treatment & Follow-up

Plan management & monitor outcomes

Feedback / Self-Evolving
